Specifications

- Suspension Size:** For optimum performance, testing recommends luminaire total OAL (overall length) in proportion to the Body diameter. For close-to-ceiling mounting, it is suggested to use shorter single stems as noted on Spec Sheet SB115. Total luminaire OAL is defined from the bottom of the diffuser to ceiling plane.
- Stem Wires:** Equipped with 120" of leads with keyed connectors for quick connection to Body wiring.
- Suspension:** Swivel (central) stem, 5/8" steel tube. Die-Cast Ball hanger attached.
- Mounting Strap (Cross Bar):** Die-formed galvanized steel.
- Canopy:** Steel, 7" diameter, fastened internally, no exposed hardware. Ball hanger on stem that fits into cross bar allows installation on ceilings with slope up to 45 degrees. Complies with California Earthquake Code.
- Cutting Jig:** All suspensions are equipped with a Patent Pending cutting jig that simplifies cutting of center stem pipe in the field.
